

Explanation for revision of results

PACRAT Racers. I had a request to check into telemark discount for NASTAR which turned out to be 13%. While in the NASTAR site I looked at the snowboard discount and it turns out NASTAR changed the discount given to a snowboarder from 10% to 20%. I went back to the first race to apply the telemark discount to one racer and the new snowboarder discount to two racers. One snowboarder stayed in the same group with no point changes. One snowboarder moved up two groups and one telemarker moved up two groups. This impacted points for each of the impacted groups because points are in part based on the number of racers in a group. Check out the PACRAT Operations Manual under About Us on the PACRAT website for the point table. I have revised the Race 1 results (attached). Let me know if you have any questions.

Thanks.
